Research Interests

Big Data Analytics, Performance Modeling, Resource Scheduling, Workflow Management, High Performance Computing, Distributed Systems, Machine Learning

Education

• Ph D. Candidate in Computer Science	Los Angeles, California, USA 2017 - Present	
 RELEVANT COURSEWORK: High Performance Computing and Simulations Systems, Foundations and Applications of Data Mining, Machine Learning ADVISOR: Ewa Deelman 	s, Advanced Topics in Database g, Foundations of Optimization	
Ho Chi Minh City University of Technology (HCMUT) Bachelor of Engineering in Computer Engineering, Honors Program — GPA: 8	Ho Chi Minh, Vietnam .55/10.00 2011 - 2016	
• THESIS: Developing Methods To Help Large-Scale Parallel Applications M concurrent defensed theses	Iore Reliable – Highest score among	
Research Experience		
• Information Sciences Institute, Science Automation Technologies • Research Assistant	Marina Del Rey, California 2017 - Present	
 Introduced computational efficiency model to quantify efficiency of in situ provides ability to analyze data as it is generated and store only necessary Proposed multi-stage performance indicators that capture performance of terms of multiple resource perspectives (published in CCPE 2022) 	workflows, a processing paradigm that v data (published in JOCS 2021) entire in situ workflow ensembles in	
 Determined co-scheduling strategies and resource assignments for in situ w makespan is minimized (accepted to WORKS 2022) 	workflow ensembles such that	
Lawrence Livermore National Laboratory, Center for Applied Scienti Research Intern	ific ComputingLivermore, California 2018	
• Enabled scientific workflows that couple high-performance simulations with node-local storage to reduce expensive storage needs for storing large data poster)	h big data analytics by leveraging sets (presented in SC 2018 research	
• High Performance Computing Laboratory, HCMUT • Research Assistant	Ho Chi Minh, Vietnam 2014 - 2017	
• Developed techniques to detect abnormal behaviors, e.g. message leak, rac parallel applications using message-passing programming model (published	ce condition, deadlock, for large-scale d in ISPDC 2016)	
Notable Projects		
• In Situ Data Analytics for Next Generation Molecular Dynamics Wo	orkflows 2017 - 2022	
• Designed a runtime that allows to decouple in situ analyses from the simu complexities in terms of data coupling incompatibility	lation and address decoupling	
• Yelp Recommendation based on Aggregated Ratings	2019	
• Combined sentiment score from text mining analysis to normalize star ratic collaborative filtering recommendation system	ings, which then used in a	
• Sale Forcasting for Kaggle's Predict Future Sales	2020	
• Applied Long-Short Term Memory (LSTM) and an ensemble of independe (XGBoost) models to improve precision of monthly sales prediction	ent Extreme Gradient Boosting	
• Accelerating Scientific Workflows on HPC Platforms with In Situ Pr	cocessing 2020 - 2021	
 Integrated in situ technology with traditional workflow management system jobs (published in CCGrid 2022) 	m through clustering data-intensive	
Quantum Acceleration for Scientific Computing	2021 - 2022	
• Provided a formal method for the selection of hyperparameters in designin scientific applications (accepted to eScience 2022)	ng variational quantum algorithms for	
Work Experience		
Novobi	Ho Chi Minh, Vietnam	
Software Engineer	Mar 2017 - July 2017	
o Built an automated system for deploying testing and delivering software r	packages of health care applications	

Built an automated system for deploying, testing and delivering software packages of health care applications
 DEK Technologies
 Boftware Engineer Intern
 Ho Chi Minh, Vietnam
 May 2015 - Aug 2015

 $\circ\,$ Automated the deployment of small-scale clusters with high availability

TEACHING EXPERIENCE

University of Southern California

• Teaching Assistant

• COURSES: Database Systems (CSCI 585, Master-level)

• Assisted students with course material and their programming assignments, graded midterm and final exams

Ho Chi Minh City University of Technology

• Teaching Assistant

- COURSES: Parallel Programming and Distributed Systems, Fundamentals of Programming
- $\circ\,$ Held lab sessions and assisted students with their programming assignments

Selected Publications

HONORS AND AWARDS

• ISI Distinguished Top-Off Fellowship		2017
• Elected Candidate of Vietnam Education Foundation (VEF) Fellowship		2016
• 18th Eureka Scientific Research Student Award Finalist		2016
• 7th HCMC Information and Communication Technology Award for Student		2015
• DATALOGIC Vietnam's Scholarship, CSC Vietnam's Scholarship		2014
PROFESSIONAL SER	VICES	
• Sub-reviewer for Inter	national Conference on Parallel Processing (ICPP)	2018, 2022
• Sub-reviewer for Inter	national Symposium on Cluster, Cloud and Internet Computing (CCGrid)	2020
• Reviewer for International Conference on Parallel Processing and Applied Mathematics (PPAM)		2019
• Student volunteer for Supercomputing (SC)		2018,2019,2021
Online Courses a	ND CERTIFICATIONS	
• Oxford Machine Le	arning Summer School (OxML), ML x Finance Track	2022
TECHNICAL SKILLS		
• Languages:	C/C++, Python, Bash, Java, Scala, Go	
• Technologies: Docker, AWS, SQL(MySQL, SQLite), NoSQL(PostgreSQL), Apache Hadoop, Apache Spark		
• Machine Learning: XGBoost, scikit-learn, PyTorch, Optuna		
• Tools:	Pegasus WMS, Dataspaces, Git, CMake, Visual Studio, LATEX, JIRA, Confluence	
• Operating Systems	: Unix/Linux, MacOS, MS Windows
